

## Gree Recalls 1.56 Million Dehumidifiers Due to Fire and Burn Hazards; Reports of At Least 23 Fires

Dear GE Appliances Customer:

GE Appliances has learned that Gree Electric Appliances, Inc. of Zhuhai ("Gree"), in cooperation with the U.S. Consumer Product Safety Commission (CPSC), has announced a recall of certain GE dehumidifiers manufactured by Gree between January 2011 and February 2014 due to a risk of fire<sup>1</sup>. According to GE Appliances' records, you may have purchased an affected model. Please read this communication carefully.

In light of this recall, you may want to check the model numbers of any units in your inventory to determine if you still have any of the dehumidifiers subject to this recall. If you do, the recall would indicate that you should stop sale of the affected dehumidifiers immediately, quarantine those units, and contact Gree as soon as possible so that it may provide further instructions.

Please note that the model numbers listed in the joint press release from Gree and the CPSC reflect the "Full Consumer Product Number," which includes two additional digits at the end of the number that may not be present in your records. The "Impacted Model List" below shows the correlation between the SKU/Marketing Model number that may exist in your records and the potentially corresponding Full Consumer Model Number listed in the recall notice. If you have a SKU/Marketing Model Number that is impacted, we ask that you inspect the product to confirm the Full Consumer Model Number for that unit. Confirming the Full Consumer Model Number is necessary because, in some cases, there may be models that share the same SKU/Marketing Model Number that are not impacted by the recall. The Full Consumer Model Number is present on the unit's carton barcode label as well as on the product label of the dehumidifier itself, as shown in the images below.

Finally, if you have any records of any person(s) to whom affected models were sold, you should contact Gree to inform it of the existence of these records.
